## Diamond

The idea that came to us in the hustle and bustle of the High End 2006 when we saw the females of the audiophile species looking rather unhappy was to bring the first 'feminist' record player into the market: fully assembled, with a pre-tuned cartridge and tracking weight, the set-up a piece of cake, and the whole thing in shocking pink!!!!

The little brother (or sister?) of our big turntables was born! The Hi-Fi community ridiculed and scoffed initially, but, to our surprise, the Pink Diamond has sold almost as often as the Black Diamond. And to lots of very serious male enthusiasts, too.

Katie Melua was the world's first proud owner of this model (although she chose the simple black version), and she is still having fun using it today. It can be seen a number of times in her album teaser on YouTube.

The Diamond features a Rega RB 202 and the Benz Micro MC Silver, but is also available without a tonearm. We can manufacture arm boards for all tonearms on the market. Thanks to the swivelling arm boards, 12-inch tonearms can also be attached. Up to three tonearms are possible in total.

## The Sound

The Diamonds sound is particularly intense at small line-ups such as singer/songwriter, jazz and chamber music thanks to its high resolution and intense stereoscopic depth.

## Finish & Versions

### Chassis Colour

Very pink, very classy, very outstanding - that is the `Diamond`. It is also available in black and transparent as well as with a slate chassis.

### Platter Colour

The platter comes in matt acrylic as standard. A polished platter is also available upon request, at extra cost.

### Motor Colour

The motor is made out of solid aluminium and can optionally be black anodized or polished to a high gloss. As standard, dark turntables are supplied with a black motor and light/transparent turntables with a high-gloss motor.

## Specifications

### Dimensions:

480 x 430 mm

### Weight:

ca. 18 kg

### Motor:

Electronically regulated DC-Motor for 33 and 45 rpm, stand-alone, massive metal housing

### Pulley:

For string drive, stainless steel

### Drive belt:

Nylon string

### Platter:

Acrylic, precision-turned with 1/100 mm tolerance, 50 mm height, 4.7 kg

„...Diamond has some of the tightest bass I have heard...“  
(HI-FI World - 1/2008)

“OK, the colour takes some getting used to, but as regards acoustic performance, there is no question that it is right out in front!”  
(LP - 3/2007)

„A Diamond is a Girl's Best Friend“  
(Hi-Fi+ - Issue 55)

## Scheu Analog Turntables

Turntables from SCHEU are synonymous from Berlin to Ushuaia with a most audiophile sound quality, tonal balance and, last but not least, outstanding durability. They are all belt-/string-driven heavyweight turntables and they all use an inverted bearing.

Production quality is of the utmost importance to us, and we work exclusively with suppliers

from Germany. This means that our final products are 'Made in Germany' through and through - apart from the Rega arm on some models, which fortunately is being built to the same exacting standards.

Our turntables are carefully manufactured by hand and offer a suitable solution for everyone, no matter what your requirements, from the beginner's turntable Cello to the very sophisticated reference-beater Das Laufwerk No. 2.

Errors and omissions excepted. Specifications and design are subject to changes without prior notice.
